NS Patients Needed for Drug Trials

0 (no drug trials)

0 (no drug trials)

200 (2/3 trials fail due to lack of patient participants)

2000+
Patients needed

More trials coming...

For every **1** patient connected to a trial,

20

patients must be contacted.

80,000
eligible patients
per year

Only 2-5%
or 1,600-4,000
will enroll in a trial

Trials have a limited window of time to complete enrollment or they may disappear.

THE TIME IS NOW

New and Better Treatments Now Possible

NephCure Connects Patients to Trials and Expert Care

KidneyHealthGateway.com

Website connecting patients to trials near them

Clinical Trial Collaborative

100 of world's top researchers, doctors, US government, patient representatives and drug industry working together to overcome barriers to trial recruitment

Nephrotic Syndrome Specialists

Providing access to top glomerular disease doctors in United States

Community Expansion

Creating a shared sense of urgency around the globe with all NS patient groups

“Options beyond steroids... that is music to our ears! For 16 years we have watched steroids wreak havoc on Cheech’s body and crush his spirits. To know there are new therapies on the horizon and several clinical trials happening RIGHT NOW is literally a dream come true!”

- Kara Jones, patient mom and longtime NephCure supporter
