

Patient Empowerment

I AM MORE THAN MY HEALTH CONDITION

MY NEEDS

I am empowered because I have, or know how to access, the information I need to make informed decisions about my health care.

MY CHOICES

I am empowered because I am an equal partner in all decisions related to my health and treatment options.

MY VOICE

I am empowered through patient organizations like NephCure, who allow my voice to be heard and become a part of a bigger, united voice to make change in health outcomes.

MY EXPERTISE

I am empowered because my expertise of living with a rare disease is valuable. I know my journey is powerful and has meaning.

MY VALUES

I am empowered because I know health equity means more than having a fair opportunity. I know health equity also gives people like me a chance to attain their full health potential.
