

The Right Kidney Doctor Is:

- Knowledgeable about your specific kidney disease
- Actively listens
- Informed about recent kidney disease research and clinical trials
- Takes time to answer your questions and concerns
- Easily accessible
- Honest, factual and provides a great bedside manner
- Willing to have tough conversations with you
- Acknowledges your role as an active member of your care
- Includes you in the care-planning process and integrates your goals into your care plan
- Supportive
